- Time management skills and keen eye for detail

## SKILLS

Languages: JavaScript, C#, HTML, CSS

Technologies: React, jQuery, Bootstrap, Node.js, Express, ASP.NET Core, MySQL, MongoDB, Git

## PROJECTS

### FlightDex

<https://github.com/craigrobertsdev/flightdex> | <https://craigrobertsdev.github.io/flightdex/>

An Australian domestic flight booking app that allows the user to search for hotels and events at their destination.

Created as a group project with 3 other programmers.

This project relied upon the ability to work collaboratively with a group of programmers. Significant use of asynchronous JavaScript was required as all data was fetched from different APIs.

- Role – Project Manager
- Technologies – JavaScript, Third-party APIs, Bulma, CSS, HTML

### eCommerce Backend

<https://github.com/craigrobertsdev/eCommerce-Backend>

A JavaScript based eCommerce backend comprised of a REST API and database to store products, product categories and description tags. Each endpoint implements the standard create, read, update, delete actions and can be connected to by any front-end to create a simple eCommerce site.

The API is created with Express.js and the database uses MySQL. Sequelize is used to create database models and execute queries against the database.

- Role – Solo Developer
- Technologies – JavaScript, Node.js, Express.js MySQL, Sequelize

### Employee Tracker

<https://github.com/craigrobertsdev/employee-tracker>

A command-line tool that allows business owners to create relationships between the departments, roles and employees from their organisation and store that information in a database. The application has an intuitive command-line interface that allows the user to create, read, update and delete entities within the database, and provides prompts for the required information to complete each operation.

Database access is powered by a MySQL database and uses the MySql2 package to create models and interact with the database.

- Role – Solo Developer
- Technologies – JavaScript, Node.js, MySQL, third-party modules

## PROFESSIONAL EXPERIENCE

### Prosecutor / Supervising Senior Prosecutor South Australia Police

2019 – Present  
Adelaide, SA

- Promoted to supervisor/team-leader position in a unit that had been under-staffed for years, with significant back log of work. Set up processes to increase efficiencies and decrease double handling of tasks. In doing so, reduced outstanding work by 50% in a few months.
- Provided significant input in state-wide policy implementation of electronic document service which saved operational police hours of work per week.
- Seconded to Unit Manager position for several months during period of significant staffing pressures and assisted senior management in decision making for placement of new staff. Correct placements have resulted in incoming staff feeling welcome and set up for success.
- Delivered training to new prosecutors across all aspects of the prosecution function, appreciably increasing knowledge and confidence coming into the role.
- Assisted numerous team members in dealing with difficult personal situations that affected their work performance. Provided modified duties or support from internal services which resulted in them being more productive and happier in the workplace.

### General Duties Officer South Australia Police

2014 –2019  
Whyalla, SA

- Responding to emergency calls by members of the public needing police assistance. When faced with people affected by drugs and alcohol, used strong communication skills to reduce conflict and gain voluntary compliance.
- Due to strong attention to detail and lateral thinking skills, investigations conducted into criminal activity resulted in offenders being caught and successfully prosecuted.
- Confronted by violent offenders, making potentially life-changing decisions under significant time pressure. Safely making arrests while keeping other police and members of the public safe.
- Attending schools to conduct road safety sessions for children. Improved their relationship and confidence in the police and reduced their risks around the road.

## EDUCATION

### Certificate in Full Stack Web Development The University of Adelaide, South Australia

Expected: June 2023

- Collaborated on 3 web applications using JavaScript, HTML and CSS
